

SMS Monitor...

...System monitoring for iSeries

SMS Monitor
*A way to remote monitor
 your AS/400 (iSeries / i5)
 systems*

*User defined
 communication protocols.*

*SMS BlueNote runs its own
 subsystem and will start
 automatically after IPL.*

*API functions enable you to
 integrate SMS BlueNote with
 your own applications.*

*BlueSeries SMS BlueNote can monitor
 everything that happens on your
 AS/400 (iSeries / i5).*

SMS BlueNote can monitor every movement and process on your AS/400 (iSeries / i5). You can monitor system messages, message queues, message files, job, user profiles and you can also make a conditioned monitor session.

For instance SMS Monitor can be used to report when a given job has been executed according to the plan.

All events can be sent as SMS messages to a predefined GSM phone for instance to the operator on duty.

Also as e-mail

If needed it is possible to have the full message forwarded as e-mail as well.

OS/400 System messages can be replied with an SMS

The GSM modem makes it possible to send answers to system messages via an ordinary GSM phone.

Via SMS BlueNote you can reply to all messages send as *Reply. e.g. with "C" for "Cancel" or "I" for "Ignore".

Also more advanced functions are included. This means that you can use the SMS function on your GSM phone to execute programs and functions on your AS/400 (iSeries / i5).

Windows Monitor

Further to monitoring the AS/400, SMS BlueNote is also able to monitor Windows NT, 2000 & XP servers and workstations.

Initially SMS BlueNote is installed on the AS/400 (iSeries / i5). You decide which other units that should be monitored. Software is installed on the involved Windows servers or PC's.

All actions on the involved platforms are transferred to SMS BlueNote on your AS/400 (iSeries / i5).

A filter makes sure that only the most important messages – e.g. a virus alarm from a certain PC – is sent to the mobile.

The system can also monitor whether a unit is active, and immediately send an SMS if a PC is turned off without permission.

BlueSeries SMS Monitor allows intelligent SMS communications with system monitoring (reply msg).
